

ReqLens AI Test SRS - Inconsistency Recommendation Test

Version 1.0

1. Introduction

This Software Requirements Specification defines requirements for a university event management system. It intentionally includes contradictions and inconsistencies for testing the ReqLens AI analysis pipeline.

2. User Registration Requirements

REQ-001: Students shall be allowed to register for public university events.

REQ-002: Only administrators shall be allowed to register students for public university events.

REQ-003: The system shall allow registered users to view all public events.

REQ-004: The system shall allow registered users to view only events they are enrolled in.

3. Performance Requirements

REQ-017: The system shall process all search queries within 500 milliseconds under normal operating conditions.

REQ-018: The system shall process all search queries within 200 milliseconds to ensure acceptable user experience.

REQ-019: The system shall support at least 1000 concurrent users.

REQ-020: The system shall support at least 500 concurrent users during peak hours.

4. Response Time Requirements

REQ-031: The system shall respond to user requests within 300 ms.

REQ-032: The system shall respond to API requests within 500 ms.

5. Authentication Requirements

REQ-033: Users shall authenticate using a username and password before accessing any restricted content.

REQ-034: The system shall require two-factor authentication for all user logins to protected areas.

REQ-035: Guest users shall be allowed to view public event listings without authentication.

6. Data Retention Requirements

REQ-036: The system shall retain user data for a minimum of 1 year after account deletion.

REQ-037: The system shall delete all user data within 30 days of account deletion to comply with GDPR.

REQ-038: The system shall log all user actions for audit purposes.

REQ-038: The system shall log only failed authentication attempts to reduce storage costs.

7. Payment Requirements

REQ-039: All event registrations shall require payment before confirmation.

REQ-040: Free events shall allow registration without payment.

REQ-041: The system shall notify users of successful payment within 5 seconds.

REQ-042: The system shall notify users of successful payment within 2 seconds.

8. Access Control Requirements

REQ-043: Faculty members shall be allowed to create and manage university events.

REQ-044: Only administrators shall be allowed to create university events.

REQ-045: Students shall not be allowed to modify event registrations after the registration deadline has passed.

REQ-046: Students shall be allowed to cancel their event registration at any time, including after the deadline.
